EDUCATION

University of Illinois at Urbana-Champaign August 2026 - December 2028 (accelerated)

Bachelor of Science in Computer Science

Related Coursework:

Data Structures Discrete Structures

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks/Tools: React, Node.js, Flask, Git, Google Cloud Platform, VS Code, Visual Studio, PyCharm

Spoken Languages: English, Tamil, French

WORK EXPERIENCE

Experience Coding LLC IL, Vernon Hills

Student Vice President of Business August 2025 – June 2026

- Led a team of interns, fostering professional development and optimizing workflow through strategic task delegation
- Spearheaded digital transformation and online brand identity for local SMBs
- Architected and optimized intuitive, high-fidelity UI/UX interfaces leveraging Figma

Intern August 2024 – June 2025

- Facilitated impactful STEM workshops for K-8 students, cultivating foundational skills in coding, engineering, and 3D design
- Collaborated to enhance local SMBs' online presence

PROJECT EXPERIENCE

Fluent AI (JavaScript, AI/ML, OpenRouter API, Google Cloud speech-to-text/text-to-speech API) October 2026

- Developed a Chrome extension that uses an AI agent to guide users through complex forms question-by-question
- Integrated multilingual text and voice input, enabling users to translate questions, understand unfamiliar terminology, and receive contextual guidance
- Designed a conversational workflow that maintains user control while using AI to simplify form completion and improve accessibility for Limited English Proficiency users

Vinance AI (Python, AI/ML, YFinanceAPI, newsAPI) January 2025 – May 2025

- Created an AI-powered financial analysis tool to analyze market data and identify potential investment opportunities
- Integrated financial and external data sources to provide context-aware market insights and predictions
- Designed data processing and analysis pipelines to transform raw market information into actionable signals

OpenBraille (Assistive technology, Python) March 2026

- Architected a low-cost dynamic Braille display concept, defining hardware requirements for accessible tactile output
- Developed embedded software for real-time text-to-Braille translation and control of tactile actuators

IPV4 Subnetting Practice (JavaScript, HTML/CSS) October 2025

- Developed an interactive IPv4 subnetting practice website with dynamic problem generation and instant answer validation
- Built the application entirely client-side with JavaScript, eliminating the need for a backend

CERTIFICATES & EXTRACURRICULAR ACTIVITIES

- **J.P. Morgan | Software Engineering Virtual Experience** 2024
- **Cognizant | Artificial Intelligence Virtual Experience** 2024
- **MasterCard | Cybersecurity Virtual Experience** 2024

AWARDS

2nd Place team at Product Space UIUC Hackathon 2026

- Outperformed 59 teams to build Fluent AI, evaluated on concept viability, live demonstration, and problem scope
